

Telematics Workshop

For details and registration, please visit the following website:

http://www.ncp.org.tw/telematics_workshop/

The Telematics Workshop aims to provide a platform for exchanging professional experience and an opportunity to show the latest developments worldwide in telematics technology and applications. All presentations will focus on three themes: (1) Utilization of Wireless Communication in Transportation Systems; (2) Toward the Realization of A Safe, Efficient, and Environmentally Friendly Transportation System; and (3) Advancements in Developments of Cooperative Vehicles and Highways. The program is given below.

Time	Topic/Speaker
